ANALYSIS OF FEED BACK:

Feedback given by students is quite encouraging testimonial to the efforts put up by the Faculty and administration for the development of college and teaching and learning process of the college, however answer to the question *“Do you think this degree will get you a job”* was not in favour of the programme opted by the student, response to this question secured only 6.64 marks which falls into the category of average. Response to the question *“Improvement in Discipline related behavior”* Improved in comparison to 2015-16. College has chartered a plan to start more value added and add on courses to overcome the issue faced about job opportunities. Focus for session 2017-18 should be on Learner centric methodologies well communicated to students, so that trust shall be generated into students.
